

Modular Labs

- Configured for the demands of your current operation
- Transportability allows for strategic positioning to wherever they are needed
- Quick installation reduces weather delays, moisture getting into construction materials resulting in mold contamination, and on-site traffic from workers, equipment, and suppliers
- Pre-engineered and configured based on use with-in industry needs including analytical laboratories, cannabis laboratories, and cGMP
- Standard offerings are customizable and configured to provide the ideal workflow
- Finished in about half the time of traditional construction
- Site ready for connection to power, water and sewer
- Provide cleanroom process areas and laboratory/R&D space
- Give lab technicians the ability to perform their work duties and quality control protocols in a remote setting
- Available as open areas or with specific zones for use separation
- Can be hooked up to existing building connections or function independently
- Factory Acceptance Testing
- Custom Options and Floor plans Available
